Healthcare and Medical Labels

Saito is HACCP certified – we have a custom built label production environment at Saito New Zealand. In our ECP room (Environment Controlled Production) we manufacture many products specifically for patient care used in pharmacies, laboratories and hospitals.

With increasing pressure on health care providers for more efficiency and better electronic records, our solutions make patient and resource management faster, more accurate and ultimately safer.

We can help you:

- Record patient admissions and track treatment
- Manage processes such as sterilisation or laboratory work
- Minimise risks including administering incorrect medications
- Keep track of your assets and corresponding preventative maintenance schedule

Tracking in real time maximises the speed and efficiency of treatment in your organisation. We have the products and the expertise to help you do this.

Consumables:

Patient Wrist Bands

In May 1985 Saito started out in our founding directors' basement, and in June 1991 Saito opened its Queensland office.

Today Saito remains a private family run business in the second generation of leadership.

Saito has an awesome reputation in the marketplace which has been derived from the customer centric culture instilled by our founding director and delivered by all team members, even via our casual staff. Everything we do is aimed at exceeding our customers' expectations.

Award winning customer service is one attribute but Saito are continually innovating to find ways to deliver products more competitively and take operational expenses out of our customers' business. We ourselves are manufacturers and understand that price is a key factor in any trading relationship along with confidence in quality and dependency on deliverables.

Saito continue to grow and we are immensely proud that a great majority of both our customers and staff have been with us for over twenty years and remain very loyal. As we do to them!
