## Timber and Forestry

Trees right across the world have been tagged with Saito products over the last 30 years. We've learnt a huge amount about your industry during that time, and have created a range of labels and machinery to cope with the harshest of climates.

### We can help you:

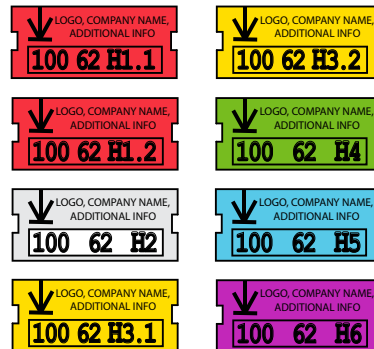

- Keep track of timber through every process from logs in the forest to individual boards at a retail level.
- Make sure the identification lasts in a supply chain prone to extreme weather conditions from monsoons to droughts.
- Meet all regulatory requirements with tags that comply to all rules and regulations set down by authorities in Australia and New Zealand.
- Identify your stock in an accurate and timely way.

At Saito, we offer timber and forestry businesses both equipment and tags for treatment identification, packet labelling, kiln drying and a range of other processes. Tags that fit your conditions so we have a range of materials in tags and labels that will make sure your products are identified accurately.

### Products available:

- Log tags for JAS tracking
- Kiln tags for easy and accurate identification on all products
- Repulpable log tags as required to identify chain of custody
- Outer pack labelling and tags
- Colour code solution for treated timber ID
- Tethered and portable barcode scanners
- Thermal label printers (industrial, desktop & portable)
- Retail-quality barcode labels and tags
- Blank and custom printed labels and tags
- Your choice of colours, materials and design
- Products that are tried proven and tested in the industry and that interface with the very latest in timber processing software
- Inkjet for imaging IPPC code or other information directly onto timber

### Wanting a return on your investment? Let's talk business.

As Lean and efficiency experts, we can also offer advice and recommendations on process improvement and labour efficiency. This is particularly useful if you're looking for cost-savings, or are about to invest in new machinery and systems. With over three decades spent in your sector, we can help you get the best solution for your organisation. Contact us today to hear more about our specialist timber and forestry services. Everything is designed around your business and the savings you need to make.

Practical Productivity

In May 1985 Saito started out in our founding directors' basement, and in June 1991 Saito opened its Queensland office.

Today Saito remains a private family run business in the second generation of leadership.

Saito has an awesome reputation in the marketplace which has been derived from the customer centric culture instilled by our founding director and delivered by all team members, even via our casual staff. Everything we do is aimed at exceeding our customers' expectations.

Award winning customer service is one attribute but Saito are continually innovating to find ways to deliver products more competitively and take operational expenses out of our customers' business. We ourselves are manufacturers and understand that price is a key factor in any trading relationship along with confidence in quality and dependency on deliverables.

Saito continue to grow and we are immensely proud that a great majority of both our customers and staff have been with us for over twenty years and remain very loyal. As we do to them!
