Barcode Printers

Hand Labellers & Labels

Scanners & Full Service Support

Saito are Solution Partners for Cognitive Printers. Robust and rugged are the hallmarks of the DLXi. The DLXi combines the legendary reliability of the Blaster and Advantage lines with the latest communication interfaces and performance.

Designed to operate in challenging environments, the DLXi offers an easy to use and seamless migration from our earlier models. One touch will tell you that this is not a plastic component printer. We understand the environment and workload these printers endure, which is why we use solid metal framing, metal print mechanism and components to give this printer rugged and industrial strength to stand up to some of the most challenging environments. See why they call it the "Printer You can Stand on."

The DLXi offers the most communication interfaces offered on a desktop printer (Serial, Parallel, Ethernet, USB-B and USB-A). The USB-A Port allows it to host a wide variety of devices as well as offering easy to use updates and stored formats.

DLXi Thermal Desktop Label Printer

Features:

- Same field-proven metal frame and print mechanism construction as the Blaster and Advantage printers
- Fast print speed of up to 5" or 127 mm per second
- Best-in-class first label out performance to maximize efficiency
- 203 dpi print resolution
- 8 MB Flash; 16 MB SDRAM memory
- All common interfaces (4-inch model) on one unit for maximum flexibility

4-inch DLXi with USB, Serial, Parallel, and Ethernet

- Standard USB-A Host port for connecting devices and peripherals, quick and easy support and set up without a computer connection
- Communication interfaces and updated firmware offer a direct migration path for legacy Blaster and Advantage printers (CPL)
- Cognitive Programming Language (CPL) resident with EcPL and ZcPL language emulations

Models	Print Head		Memory Max Print Speed	Max Feed RAM / Flash	Roll Diameter	Barcodes	Fonts/ Graphics	Programming Language
