Saito are a New Zealand and Australia agent and distributor for NiceLabel. NiceLabel recently launched a completely updated product line, based on 25 years of industry experience and built on the most modern technology available today.

NiceLabel 2017 is now a suite of three tools: -

DESIGN & PRINT

This means anyone can quickly design professional labels without barcoding, design or advanced computer skills. Use one of the predesigned label templates or create one from scratch in minutes even if you have never done it before. Printing the right label template with the right data is business-critical for a company of any size. NiceLabel ensures print operators experience a simple interface providing them with everything they need and no distractions. The result is a quick and accurate printing process.

DESIGN & CONTROLLED PRINT

NiceLabel's all-inclusive suite of Design & Controlled Print software provides business users with a graphical label and form designer, controlled manual printing application and automation builder for integrating with existing business systems. Businesses can significantly reduce manual printing effort and achieve new levels of accuracy and control by using PowerForms unmatched on-demand print capabilities. PowerForms features empower business users to create custom printing applications, streamline complex printing processes and eliminating errors. Custom forms allow end users to make the necessary decisions to print exactly what they want, when they want it, without deviating from a standard process or workflow. This reduces the manual printing efforts, improves the speed of printing and print productivity.

MANAGED DESIGN & CONTROLLED PRINT

NiceLabel recognise that you will design once but print many many times. Therefore the NiceLabel LMS is a next-generation all-inclusive label management system which is designed specifically for businesses that operate a quality management system and for regulated enterprises. The NiceLabel LMS includes everything you need to standardise, centralise and control your labeling. The NiceLabel LMS includes a label designer, application builder, document management system, web printing system, integrated printing system, a non-production environment and a change and transport system. It is scalable from five users to many thousands of users and can be extended to remote locations, suppliers or contract manufacturers. The NiceLabel LMS includes all of the features of NiceLabel Design and Controlled Print plus:

Document Management System

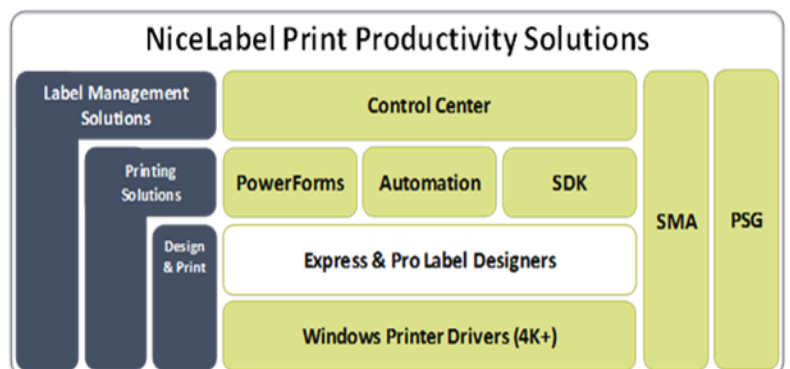

Design, review, approve and control labeling from a centralized document management system without having to install software on workstations.

Web Printing System

Web printing allows all manual printing applications to be centrally deployed and scaled business-wide and beyond with a single click.

Integrated Printing System

Seamlessly integrates printing into your SAP, Oracle and other business applications maintaining a single source of truth for your labeling data.

Scanners & Full Service Support

In May 1985 Saito started out in our founding directors' basement, and in June 1991 Saito opened its Queensland office.

Today Saito remains a private family run business in the second generation of leadership.

Saito has an awesome reputation in the marketplace which has been derived from the customer centric culture instilled by our founding director and delivered by all team members, even via our casual staff. Everything we do is aimed at exceeding our customers' expectations.

Award winning customer service is one attribute but Saito are continually innovating to find ways to deliver products more competitively and take operational expenses out of our customers' business. We ourselves are manufacturers and understand that price is a key factor in any trading relationship along with confidence in quality and dependency on deliverables.

Saito continue to grow and we are immensely proud that a great majority of both our customers and staff have been with us for over twenty years and remain very loyal. As we do to them!
