APICULTURE

All beekeepers in New Zealand are required by law to register their details and apiary locations, and any movement of hives requires those identification codes to be marked on the hives. To ensure New Zealand's hive population health there are regulations which include regular hive inspections and an Annual Disease Return.

High demand for Manuka honey in the industry is driving up the demand for hives. Bee numbers are high with 887,510 registered beehives in the country producing almost 15-thousand tonnes of honey last year.

Hive losses are steady, at just 10% of colonies, but with a big population comes risks from disease and parasites quickly spreading - American Foulbrood, Parasitic Mite Syndrome or Sacbrood virus to name a few.

Saito working barcode label solutions can be used for any number of things. From simple track and trace of honey boxes to hive inspections records that feed to an app. Barcodes have even been used by researchers on individual bees to track their behaviour in and out of the hive!

We can help you:

- Meet regulatory compliance through labelling
- Use date labelling or ink jet coding to track production of product
- Produce carton product labels to assist supply chain traceability
- Produce carton and / or pallet destination labels to assist transportation in your supply chain
- Protect the integrity of your product with anti-counterfeit labelling

Products available:

- Drum label with removable sample portions for test purposes
- Hand-labellers from Saito and Meto for batch or best before labelling
- Ink jet coding to print batch or best before information on pack
- Pallet and carton labels suited for product or destination purposes
- Label materials that are certified for use in food manufacturing (secondary and tertiary packaging)
- Adhesive options for plastic, paper, card or rough surface applications
- Thermal label printers (industrial, desktop and portable)
- Rugged tablets and portable data terminals
- Labelling systems for anti-counterfeit measures

Wanting a return on your investment? Let's talk business.

As Lean and efficiency experts, we can also offer advice and recommendations on process improvement and labour efficiency. This is particularly useful if you're looking for operational cost-savings, or are about to invest in new machinery and systems. Contact us today to hear more about our specialist services. Everything is designed around your specific business operation and the savings you need to make.

Practical Productivity

In May 1985 Saito started out in our founding directors' basement, in June 1991 Saito opened its Queensland office and in June 2018 we have opened our Trade & Technical branch in Onehunga.

Today Saito remains a private family run business in the second generation of leadership.

Saito has an awesome reputation in the marketplace which has been derived from the customer centric culture instilled by our founding director and delivered by all team members, even via our casual staff. Everything we do is aimed at exceeding our customers' expectations.

Award winning customer service is one attribute but Saito are continually innovating to find ways to deliver products more competitively and take operational expenses out of our customers' business. We ourselves are manufacturers and understand that price is a key factor in any trading relationship along with confidence in quality and dependency on deliverables.

Saito continue to grow and we are immensely proud that a great majority of both our customers and staff have been with us for over twenty years and remain very loyal. As we do to them!
