NiceLabel[®]

Saito are a New Zealand and Australia agent and distributor for NiceLabel. NiceLabel's product range suits businesses of all sizes, based on 25 years of industry experience and built on the most modern technology available today.

Do more. Faster. With less.

NiceLabel 2019 / 2020

DESIGNERS

This means anyone can quickly design professional labels without IT help. Use one of the predesigned label templates or create one from scratch in minutes even if you have never done it before. Printing the right label template with the right data is business-critical for a company of any size. NiceLabel Designers ensures print operators

experience a simple interface providing them with everything they need and no distractions. The result is a quick and accurate printing process.

DESKTOP SOLUTION

NiceLabel's PowerForms Software empowers business users to create custom printing applications, streamline complex printing processes and eliminate errors. Businesses can significantly reduce manual printing effort and achieve new levels of accuracy and control by using PowerForms unmatched on-demand print capabilities. Custom forms allow end users to make the necessary decisions to print exactly what they want, when they want it, without deviating from a standard process or workflow.

This reduces the manual printing efforts, improves the speed of printing and print productivity. With PowerForms Suite you can integrate printing with existing business systems and hardware devices such as PLCs or weight scales.

LABEL MANAGEMENT SYSTEM

Manage the quality and security of labeling to decrease risks and hidden costs.

The NiceLabel Label Management System standardizes your entire label printing process into one platform. It includes everything you need to transform your labeling processes. The result is a leaner, more agile operation that enables companies to respond more quickly to changing market conditions and requirements, get products to market faster and compete more effectively in the sectors where they do business.

It is scalable from five users to many thousands of users and can be extended to remote locations, suppliers or contract manufacturers. The NiceLabel LMS includes all of the features of Designers and Desktop Solution plus:

Document Management System

Think of it as SharePoint for labeling. Design, review, approve and control labeling from a web application without having to install software on workstations.

Web Printing System

With the web printing system, you can centrally deploy and manage all manual printing applications to multiple sites, locations and third-party suppliers, contractors and vendors with a single click.

Integrated Printing System

Integrate label printing with SAP or other business systems to increase label accuracy, printing efficiency and establish a 'single source of truth' for your labeling data.

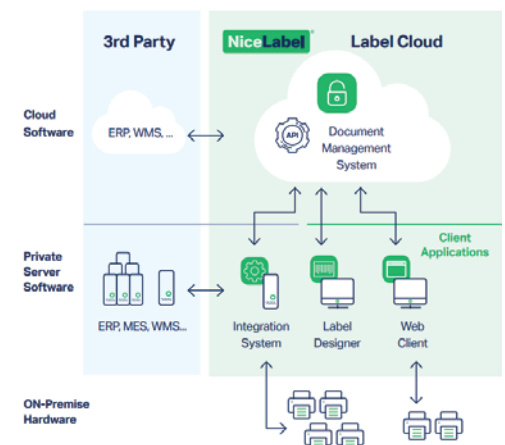

Deployment options:

Perpetual / On-Premise

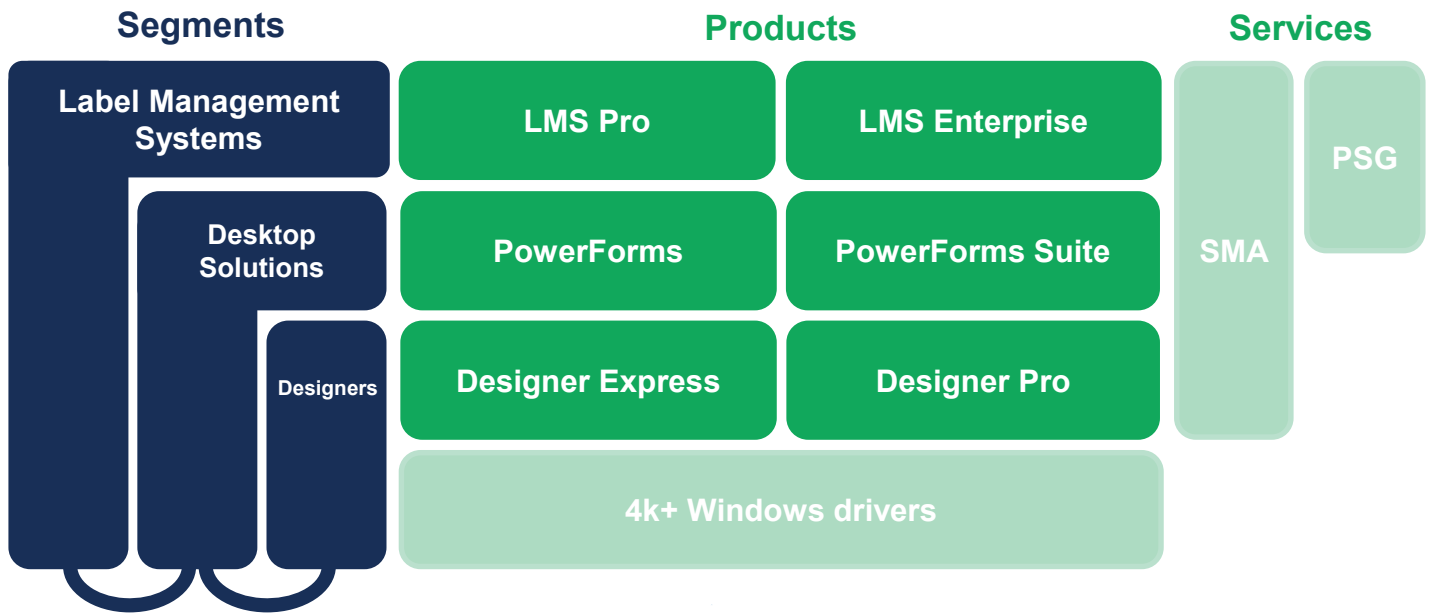

LMS Enterprise is an on-premise edition of the label management system that is hosted on your own IT infrastructure.

SAAS / Cloud

Label Cloud is a public cloud edition of the label management system. It is multi-tenant and hosted in the Microsoft Azure cloud. It is the out-of-the-box service that requires no IT infrastructure, installation or IT support.

NiceLabel Platform

Professional Services Group

NiceLabel's Professional Services Group (PSG) is a team of trained industry professionals who offer services tailored to your company and industry. PSG works with you to ensure your system is configured and implemented according to best practices and that your labeling system meets your business' unique system, business and regulatory requirements. They are there to ensure a smooth, efficient transformation of your labeling.

Software Maintenance Agreement

The NiceLabel Software Maintenance Agreement (SMA) offers enhanced support and free software upgrades to NiceLabel customers. There are two levels of SMA support designed for customers of any size, and in any geographic location. Regardless of level, the NiceLabel SMA ensures that you have:

- Priority access to NiceLabel technical experts who will work with you to quickly address issues and minimize interruptions to your business.
- Free software upgrades, ensuring that you have the latest technology at your fingertips and a lower total cost of ownership.
